

To Whom It May Concern,

I am not yet a listener of XM Satellite Radio but plan to be in the near future. I do alot of traveling in my job and would really benefit from the traffic and weather channels. XM Satellite Radio offers the variety and quality that I am looking for and I am excited to soon be a member of these services. I am asking you to please reject the NAB's petetion 04-160 for it should not be up to them to dictate what I am permitted to hear.

Thank You,

A concerned future listener of XMSR.
